Following the recommendations of the Base Realignment and Closure (BRAC) Task Force, Arlington County and the business community collaborated to form the Crystal City Business Improvement District (BID) in 2006. Funded by commercial property owners within the established overlay boundary, the Crystal City BID was created to provide macro-level services above and beyond those being rendered by the County or performed directly by private property owners. Geared to transform the perceptions and reality of the area, the Crystal City BID continues to enhance the overall community and business climate for economic sustainability and long-term growth, while propelling critical long-term redevelopment as outlined in the new Crystal City Sector Plan, which passed in 2010.

The Crystal City BID staff, board, and key stakeholders live, breathe and fully comprehend the daily Crystal City environment with a precision and focus that ensures a creative and vital area lens, perspective and awareness that neither individual owners nor County staff could attain alone. In delicate balance, the Crystal City BID’s effectiveness is contingent on the commitment and cooperation of private property owners and the County. By connecting and leveraging these strategic partnerships, the Crystal City BID has achieved stunning results within this program framework. Landowners provide access to and use of space, assets, and other right of ways while County Staff provides guidance on and support for everything from gateways, permits, life safety, special operations, art walls, banners, and more. Through this uniquely informed approach the small-in-size though large in efficiency, energy, and ideas, Crystal City BID has dramatically changed the neighborhood’s perception, image, brand, and experience and contributed to the organization’s reputation as one of the most effective public-private partnerships in the country.

Despite the Crystal City BID’s success, intense challenges remain. Historically high vacancy rates resulting from BRAC and unanticipated structural shifts in the commercial office marketplace have created new obstacles and slowed key areas for progress, particularly in the context of private redevelopment. These challenges are compounded when investments in public infrastructure that support redevelopment, such as critical transit investments and completion of the vision for Long Bridge Park, are not delivered as promised. With these complexities in mind, the Crystal City BID continues to pursue two larger strategic initiatives — the expansion of the organization’s overlay boundary to include the whole Crystal City/Pentagon City/Potomac Yard submarket, and process simplification for the tools necessary to implement key competitive repositioning. The expanded area scope and streamlined project approach more effectively matches the geographic, economic, and demographic realities on the ground while allowing market responsiveness not available in standard government fashion. With private development projects underway along the future 12th Street and the addition of new transit connections, the psychological barriers between each of these individual areas will be removed creating a seamless, more sustainable and highly functional urban district.

Within the scope of the Crystal City BID work plan and current practice, there are several areas where the existing overlay has allowed for the administration and implementation of Crystal City BID programs quickly, effectively, and accountably without burdening the county staff process and also ensuring that there is trusted oversight and effective management. This practice includes place-making banners, the internationally acclaimed ArtWalls program, and indoor temporary events in otherwise vacant buildings. A similar approach applied to outdoor temporary events, temporary way-finding, and Creative Expressive Marketing opportunities gives the Crystal City BID the ability to act quickly when opportunities arise to effectively promote the area and meet mission critical objectives.
As always, the Crystal City BID works toward achieving its mission according to the goals outlined in the Business Plan (and listed below) by identifying ways to mitigate the impacts and ramifications of BRAC as well as addressing historical perceptions of Crystal City that no longer apply.

**Create measurable value for the stakeholders** through higher occupancy levels for apartment and office owners, more “quality of life” appeal for office tenants, residents and hotel guests, and higher sales for retail and restaurants by virtue of being in a popular, high-demand neighborhood.

**Ensure a regional image** through creative marketing and image-building, special events and busy sidewalks, Crystal City will be known as a first-class, friendly and lively place for residents, workers, and visitors.

**Establish unique benefits for residents, office-workers, and visitors** with special services and amenities that help attract and retain users.

**Present an attractive and user-friendly atmosphere** whether from I-395, Route 1, Metro or its sidewalks, the BID will work to make the physical gateways and spaces inside Crystal City easy to navigate, appealing and memorable.

**Stay connected, convenient and accessible** for all properties within the district through enhanced transportation systems and pedestrian routes.

**Provide sufficient parking for** the varied needs and different groups in Crystal City plus attractive, clear signs to parking facilities, starting at its gateways.

**Expand shopping and dining options by** appealing to a more diverse range of restaurants and both convenience and destination shops.

**Ensure effective management and governance** from the Board of Directors and staff that are in continual touch with the stakeholders and with opportunities for growth. The BID will work with County partners and will provide abundant opportunities for all stakeholders to help shape and monitor BID programs.

In consideration of these goals, the Crystal City BID established five key program areas - ACTIVE, ARTFUL, ACCESSIBLE, GREEN, and INNOVATIVE - within which all of its activities and programs fall. This Work Plan outlines the basic focus for each of these program areas for FY2016, and includes how they would be applied to expansion areas – more results with minimal additional administrative overhead.

The FY2016 budget plans for normal inflationary increases for administrative support costs. An approximate two percent internal contingency fund is provided in order to meet unexpected program or administrative expenses during the year. Administrative expenses include salaries and personnel legal, accounting, office/rent, parking, travel, training, conference, membership and other basic office support expenses.

HISTORY AND BUDGET

The BID was approved by the Arlington County Board on April 22, 2006 and officially began operations at the beginning of the 2007 Fiscal Year. The organization hired its first Executive in 2006 in order to carry out the key mission of the organization and lead the creation and execution of effective programs. In 2011, the Arlington County Board removed the organization’s sunset clause, allowing the organization to continue its operations in perpetuity.

Property tax assessments devoted to the BID are designated to supplement, but not replace, the County’s basic public services and property owner responsibilities within the District. The services agreement between Arlington County and the BID provides for supplemental Marketing, Programming, and Operations services to be carried out by the Corporation.

Projects and plans are based on past successes and experiences, the current economic climate, emerging trends, benchmarking with similar organizations, and in consideration of an estimated assessment level for the FY2015 year.
